CUTS LOSSES IN MATERIALS -- Moscow, Moskovskaya Pravda, 25 Dec 51

The Moscow Electrical Instruments Plant completed its 1951 program in all indexes ahead of schedule and has been working on 1952 orders for more than a month.

Losses in 1951 due to rejects were 50 percent less than in 1950. In 1951, the plant saved more than 90 tons of ferrous metals, 12 tons of non-ferrous metals, and a great quantity of tin.

Additional tens of thousands of instruments will be produced before the end of the year.

SAVES 3 MILLION RUBLES, 100,000 MAN HOURS -- Leningradskaya Pravda, 26 Dec 51

Innovators of the Leningrad Elektroapparat Plant have resolved to perfect the majority of labor consuming operations involved in producing components of the VV-154 disconnecting switch.

Innovators made 1,200 suggestions this year. As a result of those adopted, the plant saved 3 million rubles and 100,000 man hours.

EXCEEDS PLAN, SAVES HALF MILLION RUBLES -- Tallin, Sovetskaya Estoniya, 28 Dec 51

The Tallin Vol'ta Plant promised to complete its 1951 plan ahead of time, to produce 2.5 million rubles worth of goods above the plan, and to increase labor productivity 1.2 percent above the plan.

The plant kept its promise and completed its 1951 plan on 8 December. Labor productivity was raised nearly 4 percent. There was a significant decrease in production costs and the suggestions of innovators saved the plant a half million rubles.

COMPLETES 1951 PROGRAM -- Moscow, Pravda, 9 Jan 52

The Petropavlovsk Electrical Engineering Plant successfully fulfilled its 1951 program. The plant daily exceeds its assignments in the production of electrical apparatus and instruments.
